RESUMO PROFISSIONAL

Full Stack Developer with 5 years of experience in the software development lifecycle (SDLC), including 4 years dedicated to Web and Desktop application development. Solid background in Front-end (React, Next.js, TypeScript) and Back-end (Node.js, Python, Go), with a focus on REST API integrations, event-driven microservices architecture, and DevOps practices (Docker, Kubernetes, CI/CD with GitHub Actions). Experience in defining architectural solutions, working in agile teams (Scrum/Kanban), and delivering clean, testable, and easily maintainable code.

SKILLS

- **Front-end:** React, Next.js, TypeScript, JavaScript, HTML, CSS.
- **Back-end e APIs:** Node.js, Python (FastAPI, Flask, Django), Go (Gin), Java; APIs RESTful, integrações entre sistemas e microsserviços.
- **Arquitetura:** microsserviços, arquitetura orientada a eventos, mensageria assíncrona (RabbitMQ), armazenamento de objetos (MinIO).
- **DevOps/Infraestrutura:** Docker, Kubernetes, Ansible, GitHub Actions, CI/CD, Linux/Unix.
- **Bancos de dados:** MongoDB (NoSQL), PostgreSQL, MySQL, Qdrant
- **Qualidade:** Selenium, Cypress, Postman, Insomnia, Pytest, Jest.
- **Metodologias e ferramentas:** Scrum, Kanban, Jira, Confluence, Git, GitHub.
- **IA:** integração de LLMs (Claude, OpenAI Codex) a RAG, ML.

PROFESSIONAL EXPERIENCE

Software Engineer — SIDIA Instituto de Ciência e Tecnologia | 2023 - 2026

- **Architecture and Integrations:** Defined and implemented architectural solutions based on microservices and event-driven design, integrating services via REST APIs and RabbitMQ for high-frequency asynchronous data ingestion, alongside MinIO and MongoDB for centralized management of logs, artifacts, and unstructured data.
- **Back-end Development and APIs:** Built high-performance endpoints and scalable microservices using Node.js/TypeScript, Python (FastAPI, Flask, Django), and Go (Gin).
- **Front-end Development:** Developed user interfaces and operational support internal tools using React, Next.js, and Electron, delivering cross-platform Web and Desktop applications.
- **DevOps and CI/CD:** Architected and implemented CI/CD pipelines from scratch using Docker and Ansible for containerization, environment provisioning, and deployment automation, ensuring reliable deliveries.

- **Automation and AI:** Developed end-to-end automations and integrated LLMs (Claude, Codex) with RAG into team workflows, eliminating operational bottlenecks and reducing execution time by up to 60%.
- **Automated Testing:** Created testing solutions and automated workflows using Java (UI Automator), Python, and Selenium.
- **Methodology:** Worked in an agile team (Scrum/Kanban), tracking deliverables via Jira.
- **Methodology:** TypeScript, JavaScript, React, Next.js, Node.js, Python, Go, Java, Docker, Kubernetes, Ansible, GitHub Actions, RabbitMQ, MinIO, MongoDB, Linux.

Tester Engineer — SIDIA Instituto de Ciência e Tecnologia | 2022 - 2023

- **Compliance and Release Assurance:** Ensured 100% compliance in Android operating system releases in Latin America, mitigating deployment risks and post-release bottlenecks.
- **Operational Efficiency:** Optimized the build approval cycle, hardware sample logistics, and issue resolution using JIRA and internal tools.
- **High-Coverage Automated Testing:** Executed large-scale quality routines using CTS and GTS in Windows, Linux, and Android environments.
- **API and Hardware Validation:** Validated complex APIs and critical components (camera, audio, touchscreen, accelerometer) using CTS Verifier and ATM.

EDUCATION

- **Postgraduate Degree in Software Engineering with Applied AI** — UNIPDS | Expected completion: October 2027
- **Training in Android Development for Embedded Systems (AOSP)** — Icomp/UFAM | 2024 - 2025
- **Bachelor's Degree in Computer Science** — UNINORTE | 2017 - 2020

LANGUAGES

- **Portuguese:** Native
- **English:** B2
